Questions 176-180 refer to the following Web page and review.

www.momentum-program.com/home

Momentum

The Momentum app assists freelancers and small businesses in keeping track of their working hours. Its superb flexibility means it can be adapted for almost any industry. Users have control over a wide range of elements, from the categories into which timekeeping entries can be organized to the data that is included in summary reports. And the Momentum team always welcomes suggestions about how to make our product helpful to even more people.

Three versions of Momentum are available:

Individual, \$0. Designed for freelancers. Users can record their activities manually or automatically, create templates for fast entry of common tasks, and generate reports of their activities by date or by project.

Enterprise, \$5 per user monthly. Designed for businesses. All users enjoy the same benefits as Individual users, plus users designated as managers can access others' records in order to monitor their productivity and calculate payroll.

*For a one-week free trial of Enterprise, click [here](#).

Enterprise Pro, \$8 per user monthly. This premium tier entitles businesses to enjoy all Enterprise subscription benefits, plus the ability to create client invoices based on staff timesheets and to request, permit, and track time off.

Customer Review

Momentum has been a great choice for my small consulting firm. The nature of our work means that we all have to switch between tasks for different clients several times per workday, and it used to be very time-consuming to total these small units of time at the end of each billing period. Now, Momentum generates all of our invoices in just seconds, and I feel more confident in their accuracy. I have also found the summary reports quite useful, as they showed that certain types of projects consistently required more hours than I expected. I am now able to give more reliable time and budget estimates, which I am sure my clients appreciate.

My only complaint about Momentum is that the automatic time-tracking feature seems to use up a lot of processing power. Anytime I have tried it, I began to experience lags in all of my other programs. And they are not small ones—it took a full five seconds just to switch between tabs in my Web browser. Fortunately, it is easy to simply input timekeeping entries manually instead.

Overall, I am quite pleased with Momentum and would recommend it to other companies and individuals with time-tracking needs.

Local News

GALWAY (24 June)—Thornbriar Business Park has taken another step on the path towards its planned opening next February. Yesterday, city officials and local business leaders gathered in East Galway for the development's groundbreaking ceremony.

Thornbriar is being developed and will be owned by Thornbriar Partners, a group comprising a property developer and several business owners who plan to move their companies into the complex. Adrian Horgan, one of the latter, has

explained that the group bonded over its dissatisfaction with the area's existing commercial real estate options. Thornbriar Business Park, he said, was their "solution to the issue," as it will feature "airy spaces with modern facilities."

While much of the business park's space is already reserved, several units remain available. KV Real Estate, which is handling leasing for the site, will hold an information session for potential tenants at its office on 8 July. Those interested should visit www.kvrealstate.ie/thornbriar for details.

Hello,

I'm the dry goods category manager for Morton's, a growing supermarket chain. I recently picked up a sample of Chocolate Berry Crunchies at the Eastern Snack Food Expo and was very impressed. If the other flavors are that good, we may be interested in becoming a distributor. Could you send us a sample of each? You can address it to me at 710 Kramer Street, Torrington, CT, 06790.

Thank you.
